

## Sexual Communication: A Vital Ingredient to a Happy Marriage

All healthy relationships have communication as a firm foundation and the basis for marriage is no different. In marriages, emotional bonding strikes faster with similar hobbies, common tastes or more easily, with friendly talks. But sexual compatibility takes a little more time if you are not open to discuss sex in marriage.

### **Emotional bonding vs. Sexual bonding**

The debate continues even today over the superiority of emotional or physical aspects in a relationship. The truth is, you just cannot conclude. While most men vote for physical compatibility as the essential wine of marriage, women say, they can't make love without feeling close.

Communication is the perfect word, which defines a happy marriage where sexual life balances well with the emotional aspects a woman admires. In sexual communication, sex talks do you good when you talk about each other's thoughts on sex and apply it in your sexual life. Reading books on sex topics, showing interest to know the sexual likings and not forcing your partner into making love will help you come closer to sexual happiness.

Hurry, improve your sex life

" Learn to pick up the hidden vibes. You won't get it right the first time. But never stop trying

" Be expressive. Tell your partner how much a hug, touch or kiss mean to you

" Be open to each others ideas and suggestions

" Make sure you tell your partner how much you enjoyed making love to him

" Don't skip this one, respect your partner

Today, you can access informational sites on areas related to sex, read magazines or books, available in plenty. Don't be shy but approach sex in a positive way and enjoy pure marital bliss.
